

# Managing SQL Business Intelligence Operations

Course: 10988

## Course Details

Audience(s): IT Professional(s)

Technology: Microsoft SQL Server 2016

Duration: 24 Hours

## ABOUT THIS COURSE

This 24 hours instructor-led course is aimed at database professionals who manage Business Intelligence (BI) operations. This course looks at various options that provide the ability of business users to analyze data and share their findings, starting with managed BI data sources and expanding to personal and external/public data sources.

## AUDIENCE PROFILE

The primary audience for this course are business intelligence professionals. The secondary audiences for this course are technically proficient business users.

## Course Content

### Module 1: Introduction to Operational Management in BI Solutions

#### Lessons

- Rationale for BI Operations
- Roles in BI Operations
- Technologies Used in BI Operations
- Environment and Operational Standards

**Lab: Introduction to Operational Management in BI Solutions**

## Module 2: Configuring BI Components

### Lessons

- The Importance of Standardized Builds
- Configuration Considerations for BI Technologies
- BI Architectures
- SharePoint BI Environments

**Lab: Configuring BI Components**

## Module 3: Managing Business Intelligence Security

### Lessons

- Security Approach to BI Solutions
- Security Components
- Security Approach for BI Components
- The Security Approach in Different BI Environments

**Lab: Managing Business Intelligence Security**

## Module 4: Deploying BI Solutions

### Lessons

- Application Life Cycle Management for BI Solution
- Stand-Alone Deployments
- Team-Based Deployments

**Lab: Deploying BI Solutions**

## Module 5: Logging and Monitoring in BI Operations

### Lessons

- The Need for Logging and Monitoring
- Logging Options
- Monitoring Options
- Setting Up Alerts

**Lab: Monitoring BI Solutions**

## Module 6: Troubleshooting BI Solutions

### Lessons

- Troubleshoot Failed BI Solutions
- Troubleshooting the Data Warehouse
- Troubleshooting SQL Server Analysis Services
- Troubleshooting SQL Server Reporting Services

### Lab: Troubleshooting BI Solutions

## Module 7: Performance Tuning BI Queries

### Lessons

- The Need for Performance Tuning
- BI Queries to Performance Tune
- Tools for Performance Tuning
- Remediating Performance Issues

### Lab: Performance Tuning a BI Solution

## At This Course Completion

At completing this course the student will be able to:

- Describe key features of a self-service BI solution
- Describe the key capabilities of SQL Server BI in a SharePoint environment
- Describe common Analysis Services operational tasks
- Describe PowerPivot for SharePoint server
- Describe Power Query
- Describe Windows Azure HDInsight
